ENERGY-SAVING PACKAGES

Ideal offers a range of energy-saving glass packages that meet or exceed the ENERGY STAR® requirements. Our R-5 window package qualifies for the U.S. Department of Energy's stringent Building Technologies Program for Highly Efficient R-5 Windows.

WINDOW GRIDS

Colonial Prairie Diamond Craftsman

GRIDS BETWEEN THE GLASS (GBG)

Enjoy the look of divided lites without the maintenance. Grids are placed between two panes of insulated glass, making cleaning a snap.

Select from a **contour** or **flat** grid

SIMULATED DIVIDED LITES (SDL)

Our SDL option includes contour grids mounted on the exterior of the glass with a high bond adhesive system. A shadow bar placed between the panes of insulated glass completes the look.

SDL
Simulated Divided Lites

Note:
SDLs not available on diamond grid pattern.

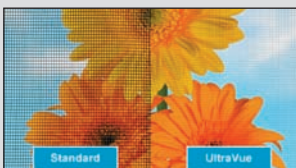

PENCIL GRIDS

Select from pewter or gold-tone.

ULTRAVUE SCREEN

This excellent visibility insect screen provides better clarity and more light through your windows.

R-5	Energy Elite	Energy Green	Energy Smart
Triple pane Insulated Glass	Dual pane Insulated Glass	Double Strength Dual pane Insulated Glass	Dual pane Insulated Glass
Two surfaces of soft-coat LowE Glass. A blend of 45% Argon Gas and 45% Krypton Gas fills the sealed airspace. Frame and sash are foam filled. Warm Edge Intercept Spacer.	Triple Silver LowE Glass. Airspace filled with Argon Gas. Frame and sash are foam filled. Ultra® Intercept Spacer.	One surface of soft-coat LowE Glass. Airspace filled with Argon Gas. Frame and sash are foam filled. Ultra® Intercept Spacer.	One surface of soft-coat LowE Glass. Airspace filled with Argon Gas. Ultra® Intercept Spacer.

THERMAL PERFORMANCE

NFRC's labels provide product-specific performance ratings for technical qualities such as U-Factor (the rate of heat loss from your home through the window during the winter), and Solar Heat Gain Coefficient (how much heat your house gains from the sun during the summer.) The NFRC label on a window gives consistent ratings that can help consumers determine both Winter and Summer performance characteristics. Look for low U-factor and SHGC numbers for highest efficiency performance.

Glass Package	U-Factor	SHGC	VT	CRF
Energy Smart	0.29	0.25	0.44	0.57
Energy Green	0.27	0.25	0.43	0.57
Energy Elite	0.27	0.19	0.42	0.57
R5	0.21	0.21	0.33	0.69

STRUCTURAL PERFORMANCE

This window has been tested to the AAMA/WDMA/CSA 101/IS 2/A440 standard for product performance. A higher PG or DP rating indicates the product has passed higher performance requirements to the AAMA/WDMA/CSA 101/IS 2/A440 testing standard.

Type	Size	Rating
Casement	32" x 60"	DP 60
